

Mouthing *Off*

Not for the faint-hearted, bold retina-searing pouts with matching nails are on everyone's lips (literally and figuratively speaking) this season. The '70s are back and it's a technicolour dream come true. Photographed by JUSTIN JONAH NG. Styled by ALICIA TAN.

PINK SENSATION
Fuschia lips are hotter than ever. Wear this day-glo shade matte on dewy skin and with baby pink varnish on the nails for contrast.

PURPLE HAZE

It takes a lot of guts to pull off this shade of purple. Save it for a night out on the town and amp it up with hints of tangerine and coral eye colours.

BROWNIE POINTS
(OPPOSITE PAGE)

For a sophisticated take on 'lips that pop', walk the line between dark and nude with a caramel lipstick and beige nails. Delish.

BERRY DELIGHT

A dark berry lip is the new red lip. It's intense and classic with a subtle romantic vibe. For an unexpected change, layer over with gloss and keep the edges smudged.

ORANGINA

(OPPOSITE PAGE)

No technicolour lip is complete without an eye-popping tangerine lipstick. Wear it on a bare face or with liquid-lined eyes, it's a sure-winner either way.
